

**COURSES FOR STUDENTS INTERESTED IN EXPLORING PHYSICS:**

Any students interested in Physics should talk to the DUS/ADUS - lots of open advising hours geared toward pre-concentrators!

**First Year**

- Students interested in Physics should plan to take **Math**, usually Math at the **21, 23 or 25** levels
  - Those who place in to **Math 1b** should take that first for a solid calculus foundation
- Students should begin taking the **Physics 15a, 15b & 15c** series as soon as possible
  - This sequence is offered each semester so it is possible to catch up later

**Third Term**

- Continue on with the appropriate **Math 21, 23 or 25** sequence if not completed in the first year
- Continue (or begin) the **Physics 15** sequence

**Note:**

- Physical Sciences 1, 2 & 3 and Physics 11 will NOT count toward Physics concentration credit
